State Project No. 56-299  
Federal Aid Project No.  
6056 (018)**

**Contractor:  
Dayton Construction  
Company, Inc.**

**Inspector:  
Dewberry Engineers**

## **REPLACEMENT OF BAILIWICK ROAD BRIDGE TOWN PROJECT NO. 06-44**

### **Infrastructure Improvements:**

The Engineering Division will be replacing the Bailiwick Road Bridge in its entirety. The bridge is located on Bailiwick Road at the intersection of Riversville Road and crosses over the Byram River. This work involves removing the existing bridge built in 1955, repaired in 2007 and constructing a new bridge.

This project is part of the DPW Engineering Division's ongoing Local Bridge Program work to maintain 75 Town owned bridges. The Bailiwick Road Bridge has an overall rating of "poor" and requires replacement. The contractor is Dayton Construction Company, Inc. of Watertown, Connecticut. Dewberry Consulting Engineers of New Haven, Connecticut completed the design plans and will be overseeing the construction of the project.

Construction will begin on Monday, May 07, 2018 and work is expected to last until December 2018. Traffic on Riversville Road will be maintained in each direction, traffic through Bailiwick Road will be detoured through Angelus Drive. Work will begin at approx. 7 a.m. each day, finishing up by approx. 5 p.m.

The project involves the complete replacement of the 33-foot wide stone masonry arch bridge. The new bridge will be a single span bridge concrete deck bridge supported by steel beams. Signs will be in place to warn drivers of the change in traffic patterns and to expect delays. The Contractor will make every effort to minimize disruption to traffic and residents and will work expeditiously to finish the project.

The contract was awarded to Dayton Construction in the amount of \$1,816,337 with 80% reimbursable to the Town through the Federal Local Bridge Program.

We appreciate your patience during construction. For any questions please contact Gabriella M. Circosta Cohee, P.E., Senior Civil Engineer, Town of Greenwich – DPW – Engineering Division at (203) 861-3151.
