

REPLACEMENT OF ROUND HILL ROAD BRIDGE TOWN PROJECT NO. 04-19

Infrastructure Improvements:

The Engineering Division will be replacing the Round Hill Road Bridge in its entirety. The bridge is located on Round Hill Road between Porchuck Road and the Rt-15 southbound off ramp. This work involves removing the existing bridge built in 1935 and constructing a new bridge.

This project is part of the DPW Engineering Division's ongoing Local Bridge Program work to maintain 75 Town owned bridges. The Round Hill Road Bridge has an overall rating of "poor" and requires replacement. The contractor is Dayton Construction Company, Inc. of Watertown, Connecticut. WMC Consulting Engineers of Newington, Connecticut completed the design plans and will be overseeing the construction of the project.

Construction began on Tuesday, March 13, 2018 and work is expected to last until November 2018. Traffic on Round Hill Road will be maintained in each direction via temporary traffic signals operating alternating one-way traffic. Work will begin at approx. 7 a.m. each day, finishing up by approx. 5 p.m.

The project involves the complete replacement of the 30-foot wide single span reinforced concrete bridge. The new bridge will be a three sided precast concrete box culvert with a precast concrete floor. Signs will be in place to warn drivers of the change in traffic patterns and to expect delays. The Contractor will make every effort to minimize disruption to traffic and residents and will work expeditiously to finish the project.

The contract was awarded to Dayton Construction in the amount of \$2,365,114.50 with 80% reimbursable to the Town through the Federal Local Bridge Program.

We appreciate your patience during construction. For any questions please contact Gabriella M. Circosta Cohee, P.E., Senior Civil Engineer, Town of Greenwich – DPW – Engineering Division at (203) 861-3151.
